What we do

“

But wait!
Homeless people don't
have smartphones,
right?

”

Our study in 2018 in France

- **A national study conducted in 2018 and published in 2019**
- **A methodology mixing qualitative and quantitative results**
- **300 homeless people interviewed in 16 cities across France**

MEDICI - Agreement number: LC-00943537.
This project is co-funded by the European Union

Our study in 2018 in France

71%

**OF HOMELESS PEOPLE
HAVE A SMARTPHONE**

...but only 29% have a monthly phone plan

... 58% are not autonomous in their administrative procedures

... disparities between socio-demographic groups

85%

Under 30 years old had a smartphone, and only 55% over 50 years old

83%

Of asylum seeker had a smartphone

78%

That have a diploma are comfortable with digital tools, and only 32% that don't have one

86%

Of families have a smartphone

39%

Of women are very comfortable with digital tools, and 60% for men

53%

That have been homeless for more than 5 years have a smartphone

Key challenges for digital inclusion

- **Tear down administrative obstacles (having an address, papers, a bank account)**
- **Make government websites user-friendly**
- **Translate everything that should be accessible**
- **Make internet access a basic right (including in shelters)**
- **Train people to use a computer (very different from smartphone)**
- **Make charging points easily available**
- **Always include users in the construction of digital tools**

MEDICI - Agreement
number: LC-00943537.
This project is co-funded
by the European Union

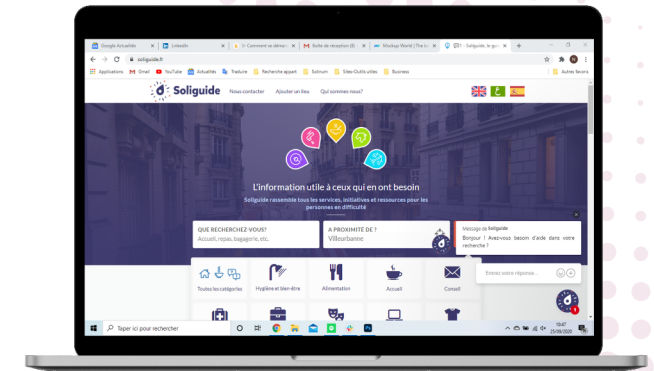

What we do with Soliguide

A digital guide that references all useful places for homeless people and refugees

All of our tools have been developed with our users : non-profits, government organizations, homeless people, refugees.

The result ? An ever-evolving platform that had amazing impact during the covid-crisis (more than 500 000 searches in 2020)

MEDICI - Agreement number: LC-00943537. This project is co-funded by the European Union

How it's accessible

A quality database

Website

Online chat

Mobile app

Printed lists

Database sharing (API)

Methodology | 4 steps

Motivate to read the world

To read the world is to recognize that each person's life has meaning in a larger context;

Understand to do

Work the look from different perspectives in search for solutions. Plan what to do;

Plan to impact

It is the step of performing;

Experiment to evaluate

Evaluate what was learned and accomplished; Read the world again.

Apps for Good

Apps for Good courses teach students about new technologies while equipping them with the problem solving, creativity and teamwork skills needed to thrive

Our pillars

Technology + Problem solving + Entrepreneurship

We teach how technology can be applied to solve a problem, along with improving young people's trust and skills in problem solving, collaboration and communication.

We focus on relevant and up-to-date technologies.

Student-driven for good

We teach young people to be active and conscientious citizens, helping to make world a better place to live.

In the course, students should have the freedom to choose their own problems and define what is "good" and relevant to them.

Give everyone the opportunity to access technology and acquire the skills to shine in a technological future – social and digital inclusion.

Transformation of the pedagogical teaching practice

We work with schools and support teachers.

We use innovative pedagogy, but we partner with teachers to ensure this work in the classroom.

The teacher adopts a role of facilitator, guiding young people in the creation of their projects.

Real World Context

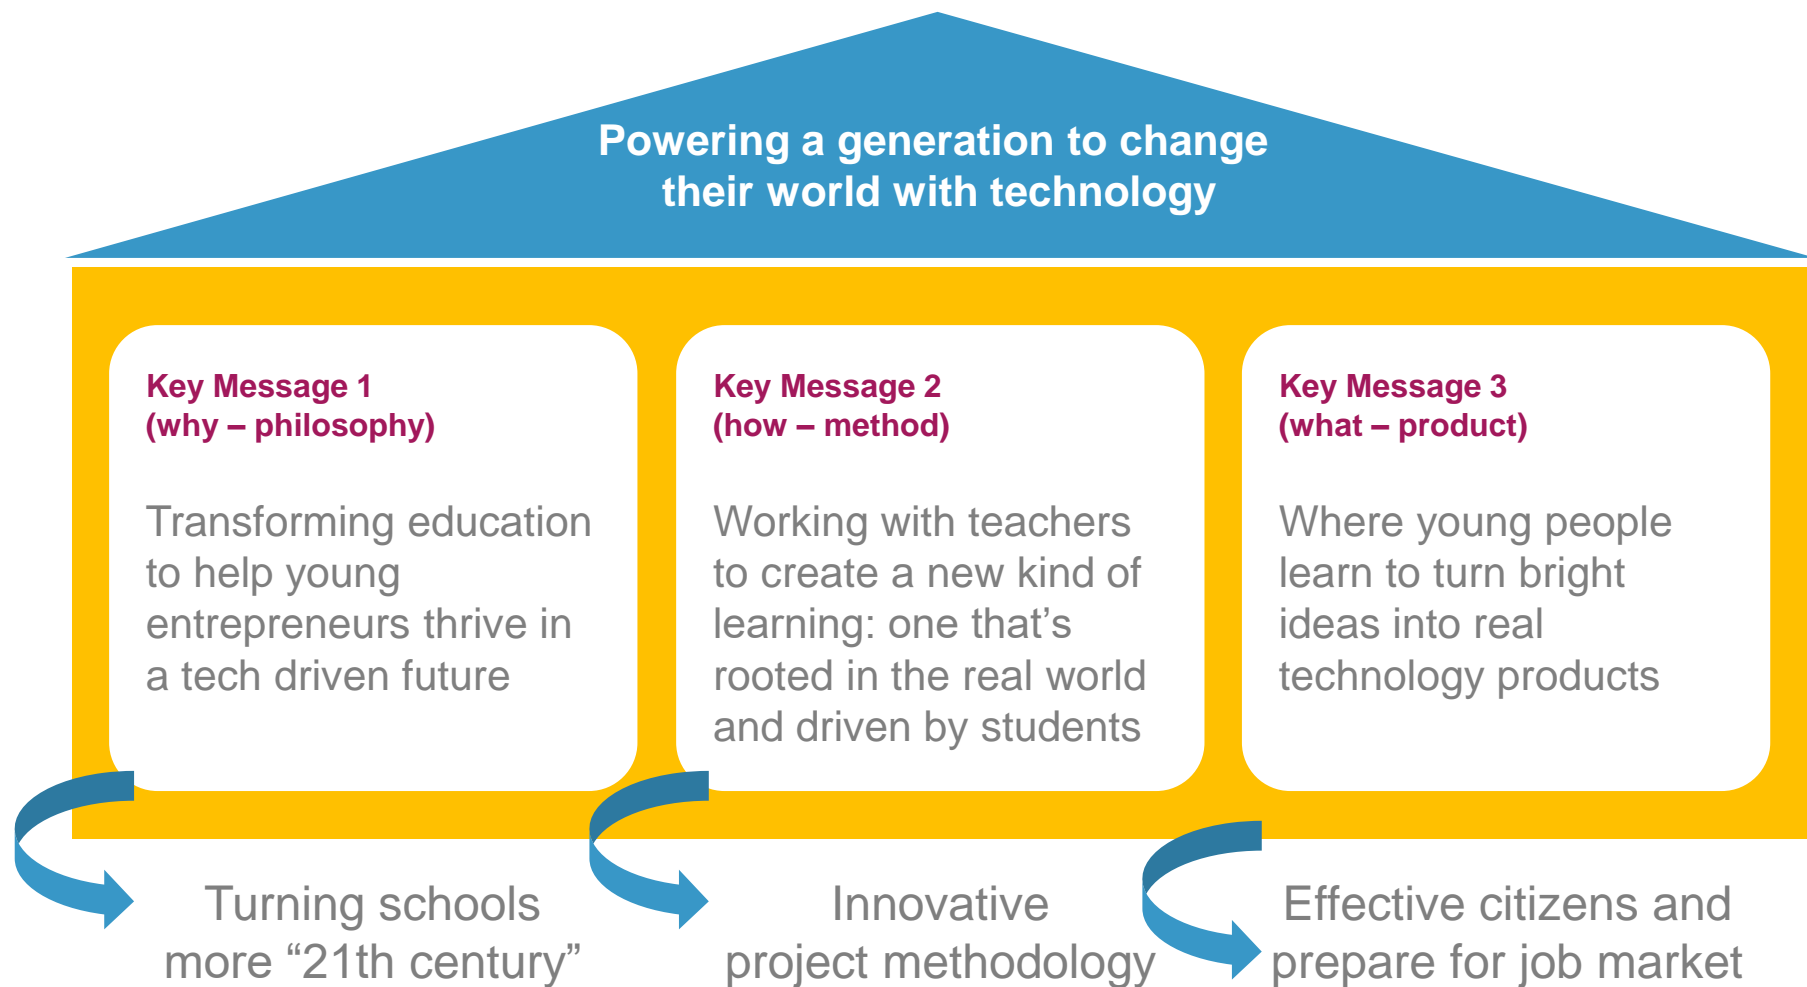

Students should work on a real product that solves a real problem.

They build their product using real-world processes that are up-to-date with industry approaches such as Design Thinking and the Minimum Viable Product.

We connect learning to the industry, through Experts, our business partners and other volunteers.

OUR MISSION

Transform Education to HELP young entrepreneurs

COURSES |

What tools are the teachers provided with?

APP DEVELOPMENT

Students will explore the process of developing an app, from the idea to the prototype, creating a functional version of it, using block programming.

10 – 12 hours
English and Portuguese

APP DEVELOPMENT EXTENDED

Students will explore the development of an app, plus extra topics like business model and user experience. They can use block programming or more advanced programming.

20 - 30 hours
English and Portuguese

APP IN A DAY

Students will get an introduction to app design and create a non-technological prototype. This is a reduced version of App Development and can be developed in just 1 day.

5 hours
English and Portuguese

MACHINE LEARNING

Students will learn machine learning, including ethical issues and their benefits, and create a ML algorithm to solve a social problem.

10-12 hours | English

INTERNET OF THINGS

Students will generate ideas and develop functional prototypes, using internet-connected devices, to solve real problems.

10-12 hours | English

7th Edition SCHEDULE

NOTE: ANY FACE-TO-FACE OR IN-PERSON ACTIVITY CAN CHANGE DUE TO THE COVID-19.

Teachers Training and School Roadshows

Regional Events and Final Event

UK Awards

Girls and Technology

Girls and Technology

What happens to girls who participate in Apps for Good?

- Became more closer to STEM
- Promotes the development of multiple skills
- Increases self-confidence
- Greater connection between the knowledge learned at school and the real world
- Promotes school motivation and involvement

What do they learn?

- 83% to communicate and interact with other people
- 56% working as a team
- 56% to be creative and to have ideas
- 44% leaving their Comfort zone and overcoming barriers
- 44% making presentations and research

App Start Up

The **App Startup** is an event that promotes key professional skills to succeed, and is an opportunity for former Apps for Good students to present their ideas to companies and stakeholders in order to develop their ideas, in a professional context.

There are no limits to App Start Up events, as long as they are meaningful and provide students with relevant experiences.
